

SUMMARY OF QUALIFICATIONS

- Over 4 years of IT experience in software development, Java training, UML design, spanning numerous business sectors
- Comprehensive knowledge of agile projects (Scrum), Test Driven Development, SOA (WebServices with Jboss, WSDL designing), GoF patterns, UML diagrams, cross-platform development environments (Linux, Windows, Solaris), and database (Hibernate, Oracle with PL/SQL, MySQL)
- Thorough experience in Object Oriented Programming languages (Java, Ruby, Groovy, PHP 5) and frameworks (JEE, Struts, Hibernate, Spring, Swing, GWT, Android, Ruby On Rails)

EDUCATION

ENSEA (Ecole Nationale Supérieure de l'Électronique de ses Applications) Paris, France
Graduate Engineering Degree in Computing and Information Systems, July 2005

RELEVANT EXPERIENCE

Crédit Agricole S.A. – Paris, France October 2009 - present
Software Architect

- Designed technical architecture for new IT projects
- Helped projects managers with writing technical documentations (set up documents, stream mappings documents, etc..)

ClubMed – Paris, France September 2008 - October 2009
Software Engineer

- Worked as a JEE software developer, as part of an agile project (Scrum), using Eclipse for JEE, on a 3 layer design (application services, business services, and DAO : data access objects)
- Continuous integration with Hudson, Maven 2, Junit (unit testing) and Fit (integration tests)
- Consumed web services using Apache CXF and Jboss WS to generate POJO classes from a WSDL contract; then used GWT to create a web client consuming these services

Société Générale Corporate & Investment Banking – Paris, France April 2008 - September 2008
Software Engineer

- Developed new features in the Calypso framework (Back Office for derivative products), using Java Swing API
- Reintroduced the Junit tests on the project, and the continuous integration with QuickBuild
- Some training in financial banking and its derivative products (OTC, vanilla, Swaps)

DCNS (a Thales subsidiary) – Bagneux, France September 2007 - April 2008
Java Trainer and Software Designer

- Trained 4 groups of 12 people on topics including :Design patterns, UML designing (with Rational XDE), Spring Core
- Designed parts of the model with Rational XDE : worked on the interactions between modules and packages, using the MDA methodology (Model Driven Architecture)

Gaz de France – La Defense (Paris), France April 2006 – April 2008
Software Developer

- Developed and maintained a Struts 1.3 based web application, backed with EJB2 (sessions and entities, generated from XDoclet) deployed on a Weblogic 6.0 server
- Responsible for the migration of the application from Apache 1.3 to Apache 2.0, and also from Weblogic 6.0 to Weblogic 8.0
- Developed a graphical tool (with Eclipse and the Visual Editor plugin) to prepare test data

Netaktiv – Paris, France July 2005 – April 2006
Software Engineer and Integrator

- Integrated websites using Lutece (a JEE Content Management System) and Joomla (a PHP CMS)
- Administrated Debian Linux servers for customers : installed Java environment for Lutece, Apache2 web servers, created email accounts backed by Postfix and DNS entries backed by Bind9

SKILLS & CERTIFICATIONS

- French (native), English (fluent, scored 925 out of 990 on TOEIC), Spanish (business)
- Sun Certified Java Programmer (SCJP) and Web Component Developer (SCWCD)
- Certified Scrum Master (certification obtained after attending Jeff McKenna's official Scrum Alliance training)

INTERESTS

Video editing, traveling and working abroad, outdoor sports
